# Audi A4 Series Cockpit

<http://www.audicomparisons.com/wp-content/uploads/2013/10/2014-Audi-A4-interior.jpg>

# Audi R15 Racing Cockpit

[http://2.bp.blogspot.com/\\_SM9A\\_sqVGgM/S9XON6I\\_WtI/AAAAAAAAADww/HcrQgfpuHgl/s1600/Audi+R15+Plus+Cockpit.jpg](http://2.bp.blogspot.com/_SM9A_sqVGgM/S9XON6I_WtI/AAAAAAAAADww/HcrQgfpuHgl/s1600/Audi+R15+Plus+Cockpit.jpg)

Different, usage contexts, user types  
and usage frequency will require  
dedicated solutions.

# Overview

Make sense of your data

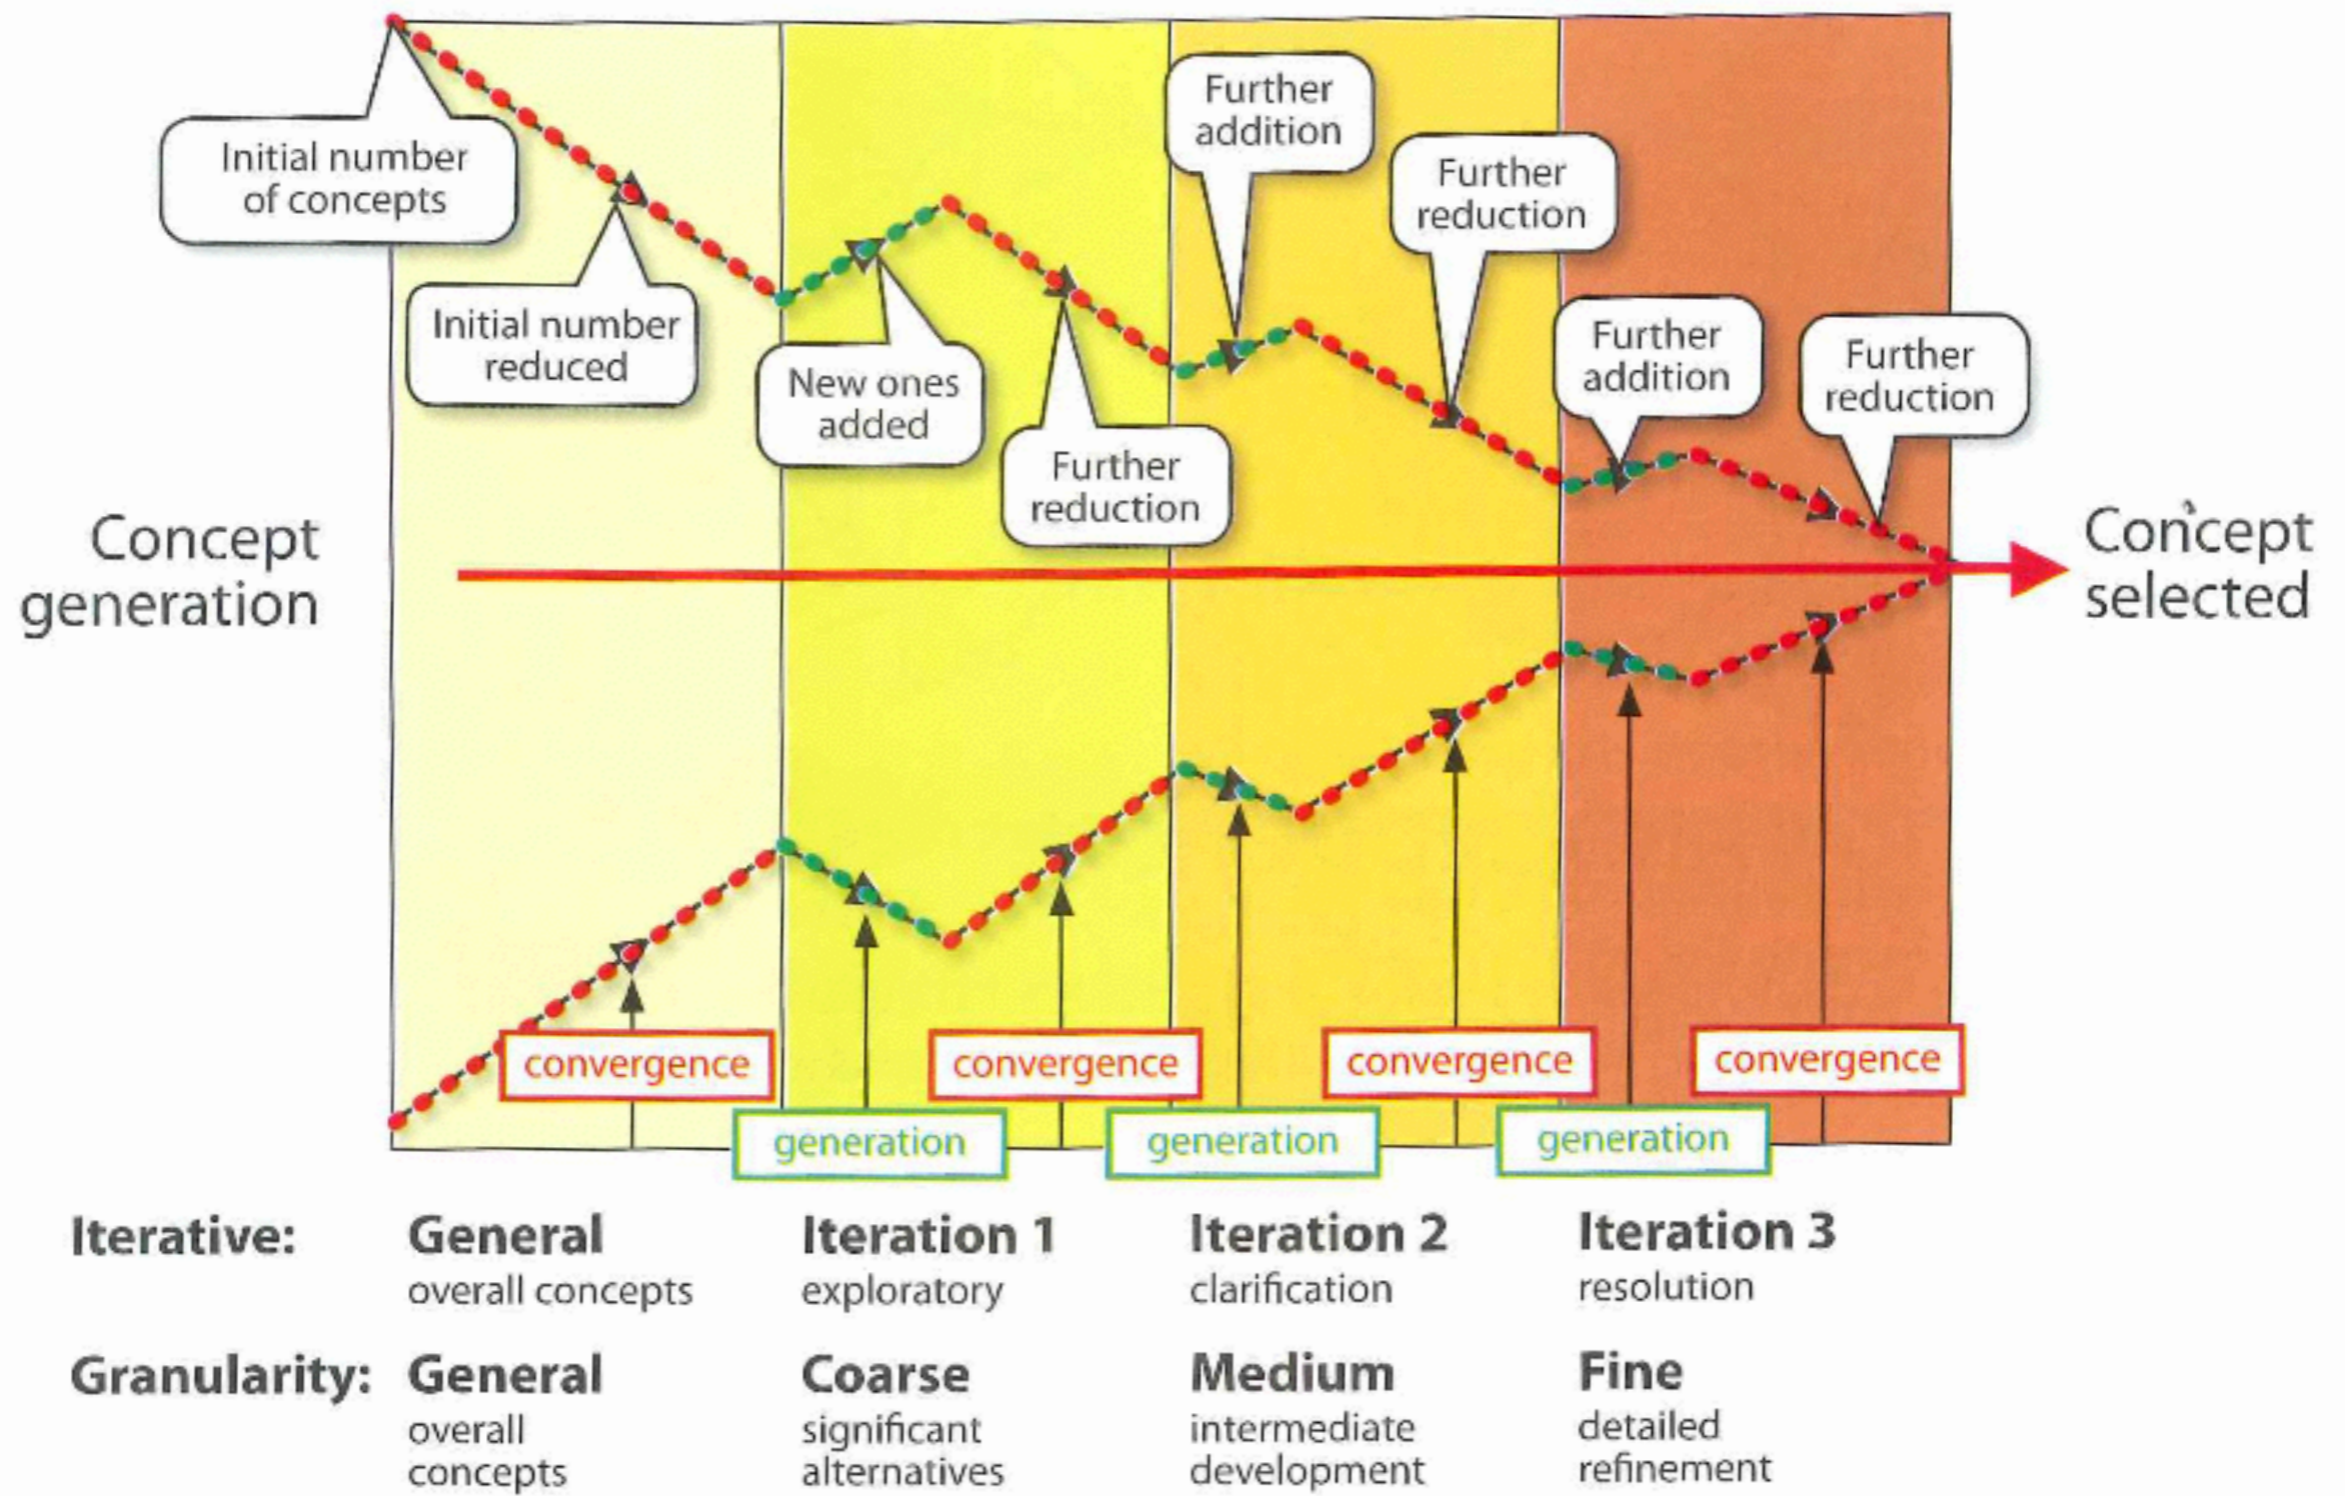

Identify important facets

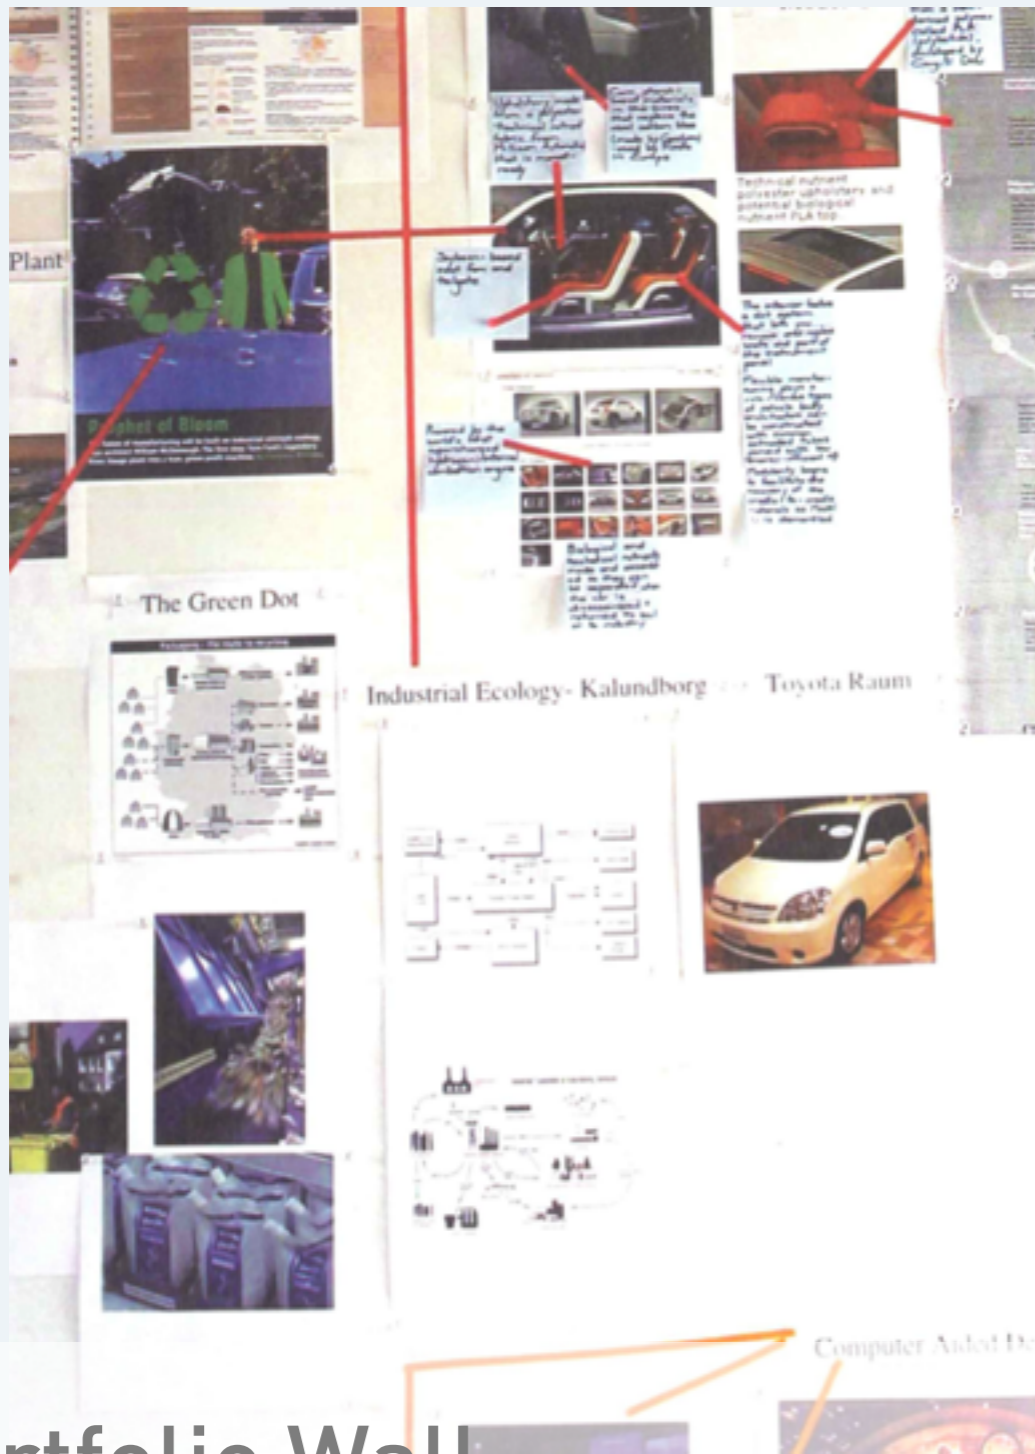

Keep all players in mind

Collect and prioritise ideas

Develop & validate solutions

# Portfolio Wall

# Competitive Analysis / Current Interface

**Four different adjustments** just to make AC right the way you like it.

**Too many buttons** Buttons could be simplified and grouped further.

**AC adjustments** do not show up on navigation screen.

**Turning Knob** for the screen on top is far back; Poor ergonomic.

**Buttons with simple icons** are centralized at a convenient location.

## What is working?

- Screen does not need to be at the same place as control.
- Tactile feel of button/Button grouping
- Buttons on steering wheel
- Use of color, materials, textures, and lights can improve information heirarchy.

## What is NOT working?

- Appropriate position for frequently used buttons is important.
- Too many buttons are intimidating.
- Buttons are scattered and not intuitive position.
- Touchscreen requires too much attention.
- Buttons rely on small icons/text which is hard to read.

# Competitive Analysis

**Trends Insight**

- More wireless connectivity to information and to others.
- More seamless integration between digital and physical world.
- Devices are more content driven and user centric.
- Better customization capabilities and mobile computing is more prevalent.

**Interior Comforts**

**Communication between Driver and Passengers**

Taking the comfort to the next higher plane, models like the 2007 Ford Expedition have ensured better communication between passengers from first to third row by using improved materials in the carpet and other features.

**Sound Insulation from Exterior**

The SUV provides more insulation behind the dashboard and door panels, thick glass and a steady roof panel, thus preventing itself from blocking the sounds.

Competitive Analysis

**80/20 rule**

**A principle for setting priorities: users will use 20% of the features of your product 80% of the time. Focus the majority of your design and development effort (80%) on the most important 20% of the product.**
