80/20 rule

A principle for setting priorities: users will use 20% of the features of your product 80% of the time. Focus the majority of your design and development effort (80%) on the most important 20% of the product.

Interaction Design

Chapter 9 (June 11, 2014, 9am-12pm):
Simplicity and Graphical User Interface Design

Part One

"Great design is as much about prospecting in the past as it is about inventing the future."

Bill Buxton

INTERACTION DESIGN

photo credits © bill verplank

source: [4]

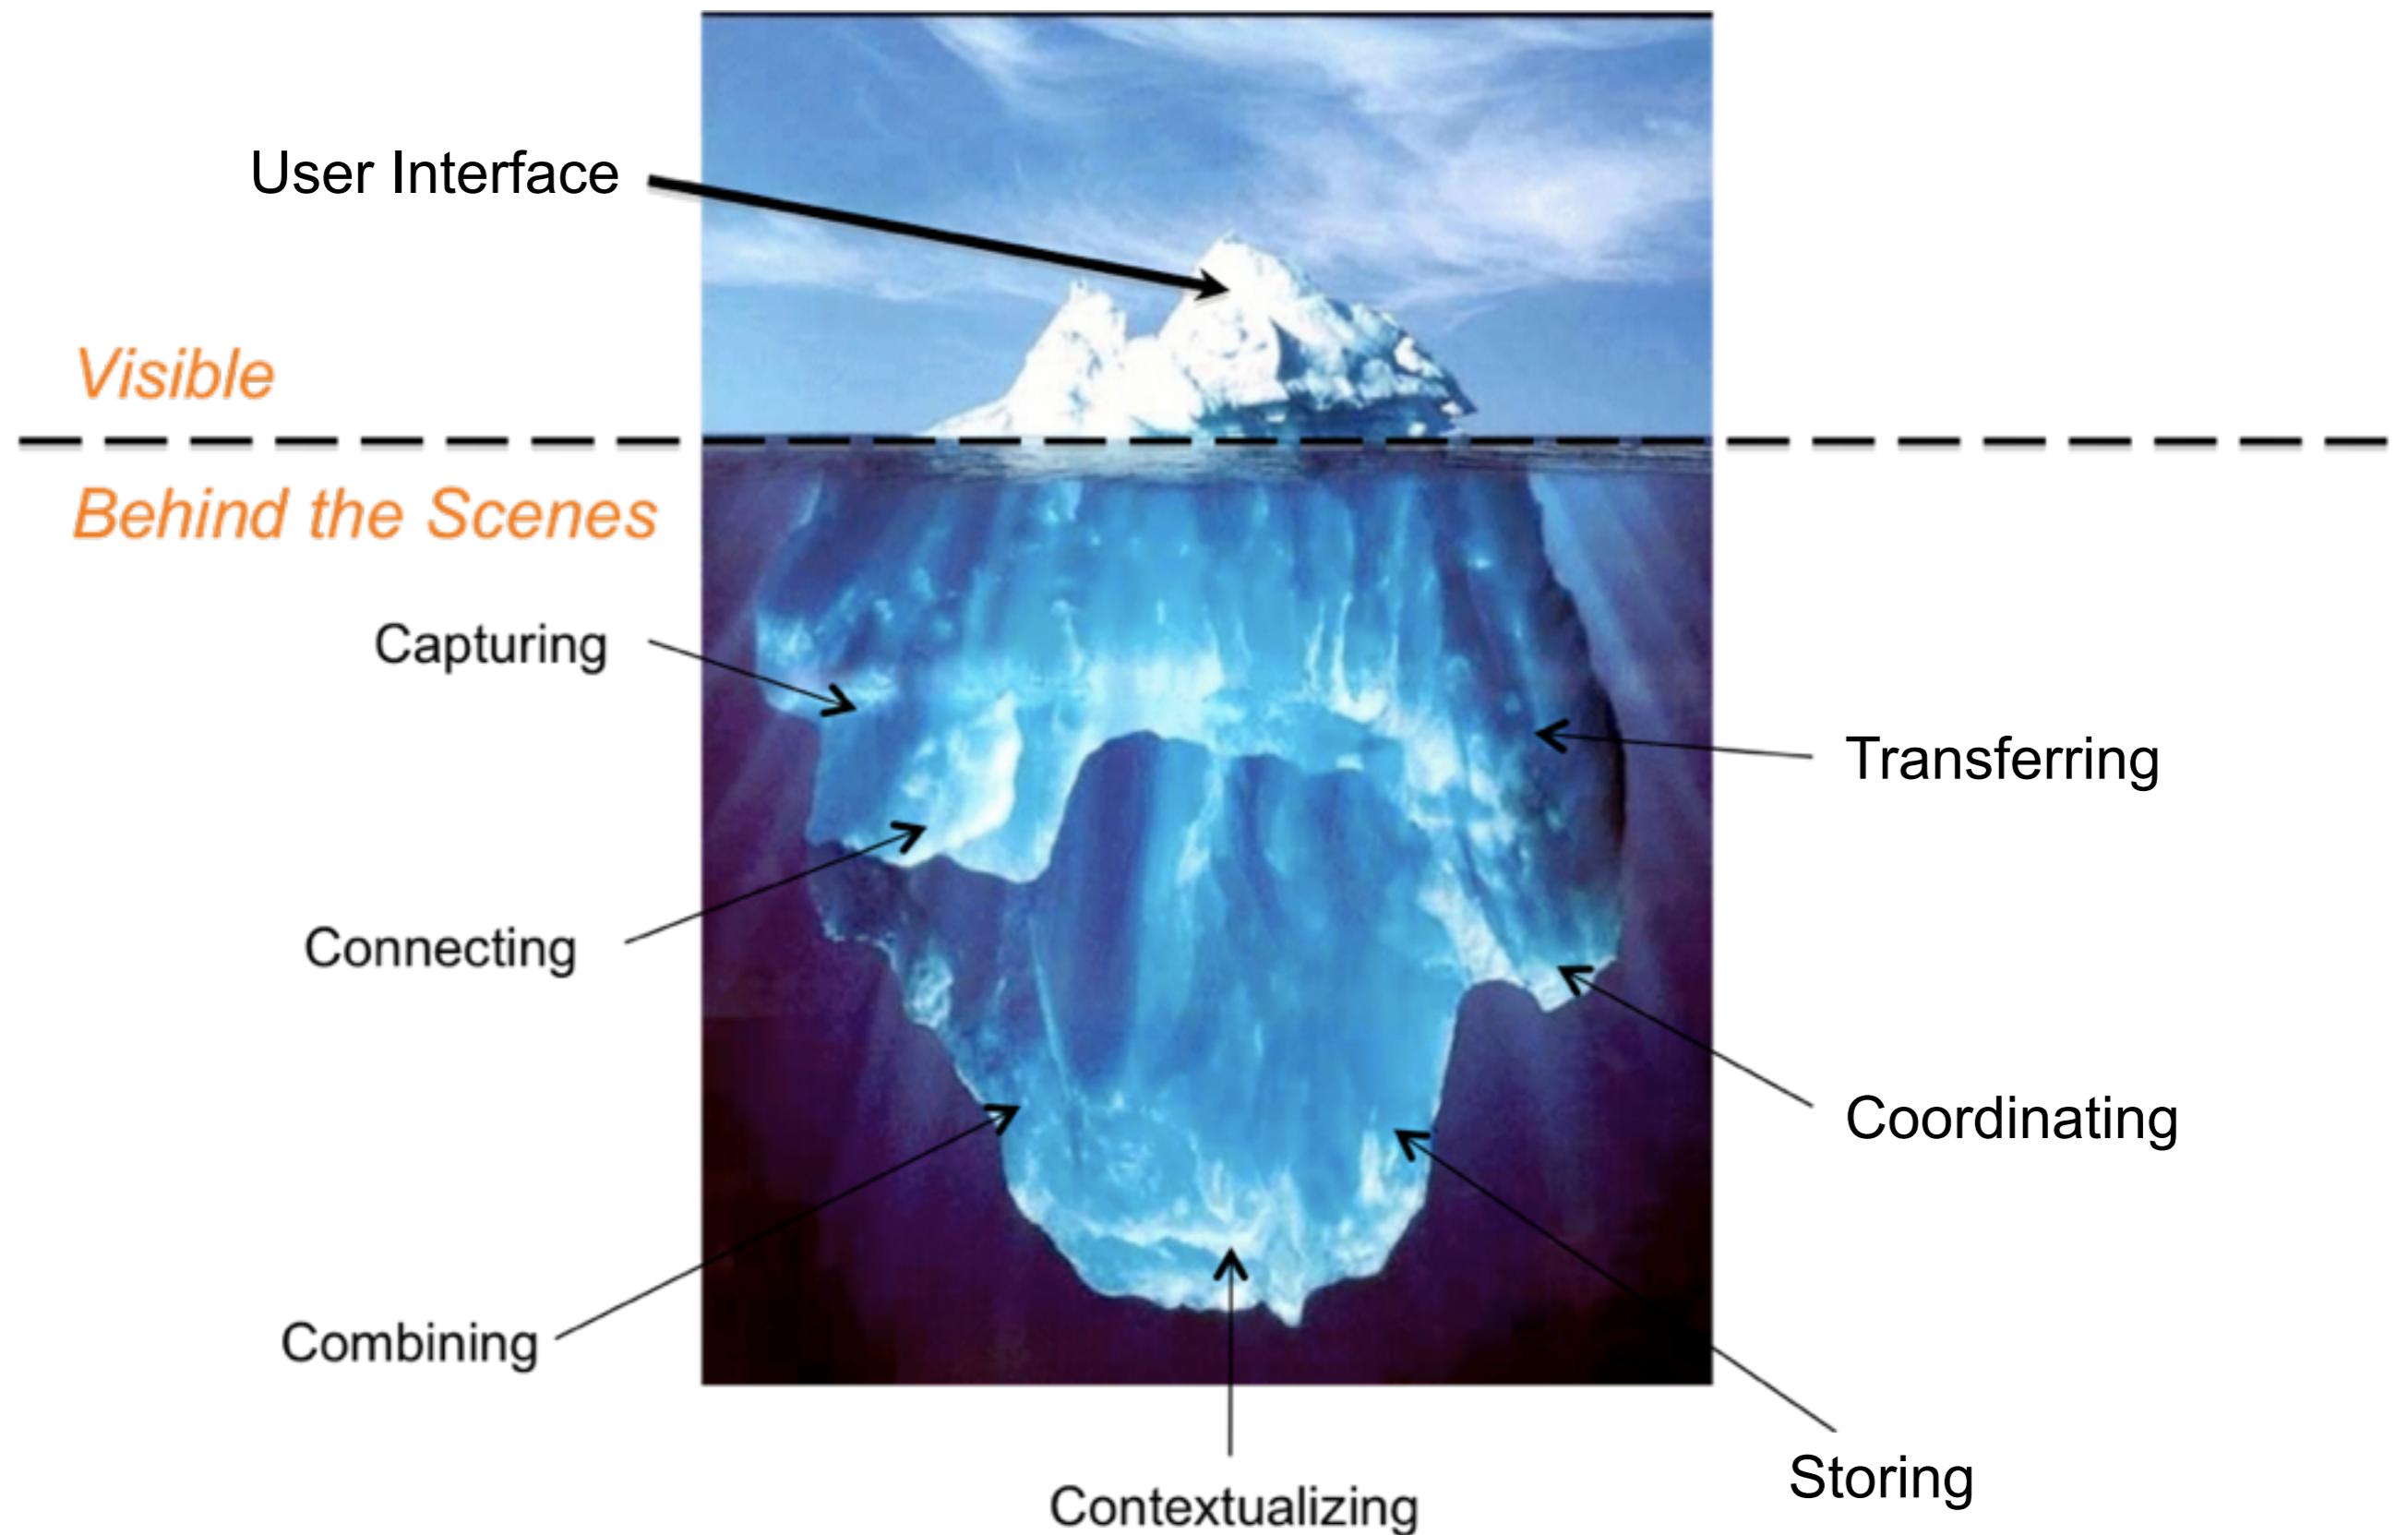

Like all forms of design, visual
design is about problem solving,
not about personal preference or
unsupported opinion.

Bob Baxley

Interface design is only the experienced **representation** of the interaction, not the interaction design itself.

Layout

source : [4]

The slide editor displays a sidebar on the left containing a list of master slides: 'SS10-Master' (selected), 'copy', and 'Slides'. The main workspace on the right shows a grid-based layout with numbered rows from 1 to 14. Each row contains a small thumbnail preview of the slide content. The first few rows show standard presentation slides, while rows 11 through 14 are currently empty.

Today's featured article

The [Cross of Gold speech](#) was delivered by William Jennings Bryan, a former congressman from [Nebraska](#), at the [Democratic National Convention in Chicago](#) on July 9, 1896. In the address, Bryan supported [bimetallism](#) or "free silver", which he believed would bring the nation prosperity. He decried the [gold standard](#), concluding the speech, "you shall not crucify mankind upon a cross of gold". Bryan's address helped catapult him to the [Democratic Party's](#) presidential nomination; it is considered one of the greatest political speeches in American history. For twenty years, Americans had been bitterly divided over the nation's [monetary standard](#). Many Americans believed bimetallism (making both gold and silver [legal tender](#)) was necessary to the nation's economic health. Bryan's speech, delivered at the close of the debate on the [party platform](#), electrified the convention and is generally credited with getting him the nomination for president. However, he lost [the general election](#) to [William McKinley](#) and the United States formally adopted the gold standard in 1900.

Visual Clutter

Clutter creates visual noise and makes an application hard to use

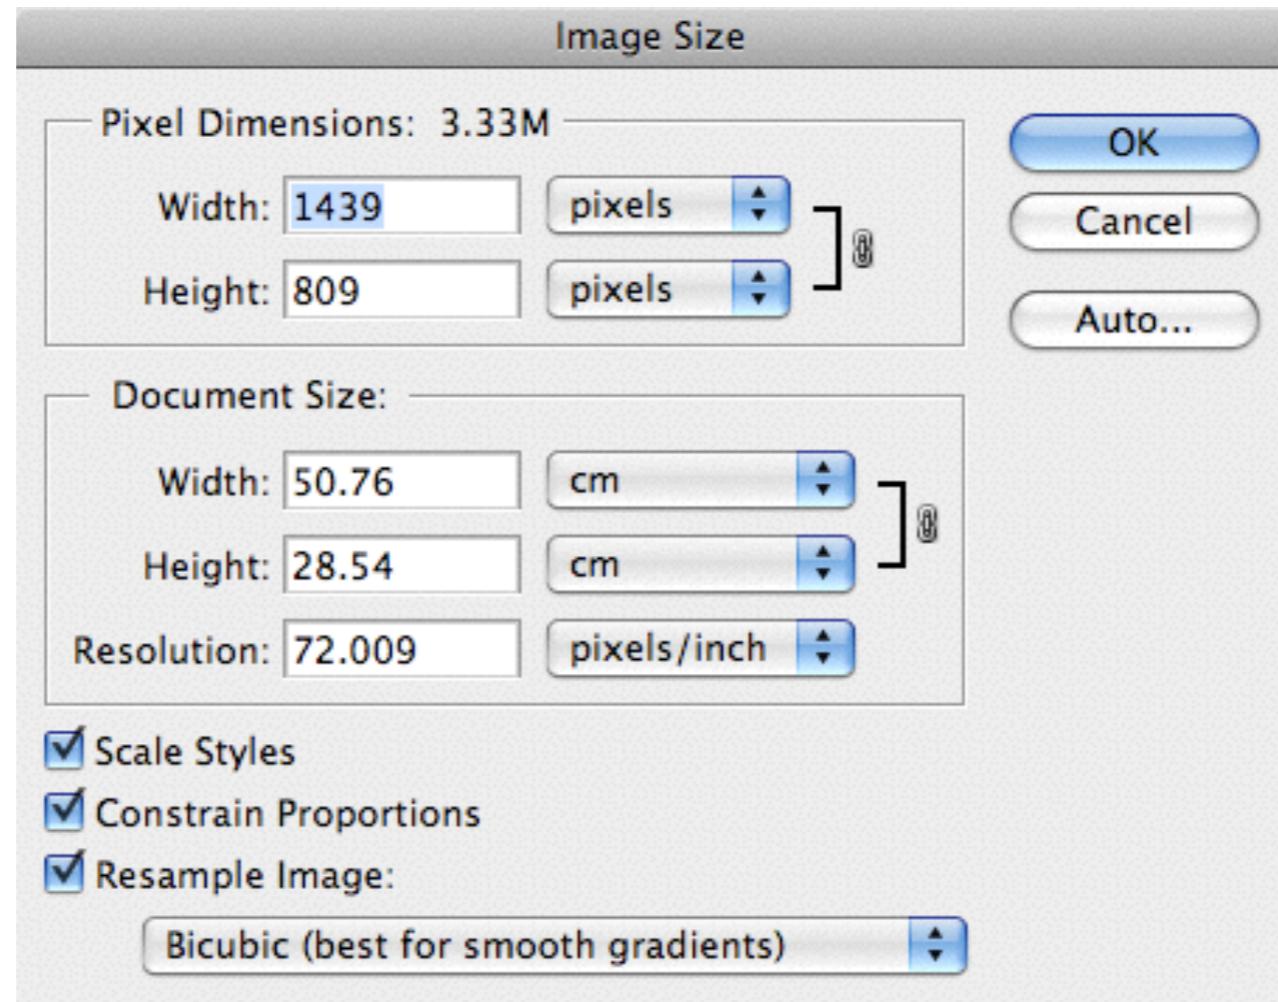

source : [4]

source : [4]

Proximity & Grouping

By grouping similar elements together, the designer helps the user deal with a complex information display by reducing it to a manageable number of units.

source : [2]

Primary Action

Secondary action

Primary Action

Secondary action

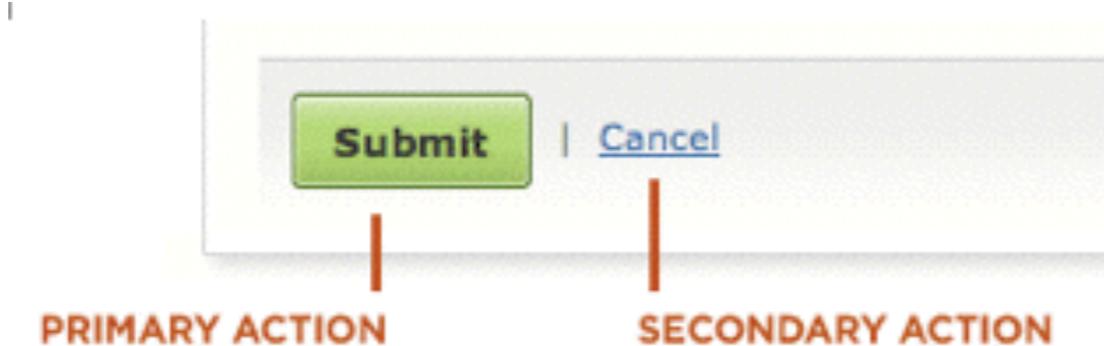

Primary Action / Secondary Action

source : [2]

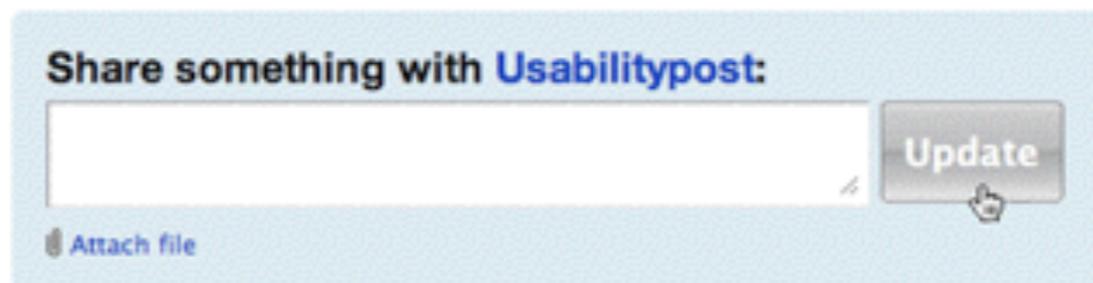

All form actions are not equal, and therefore the visual presentation of actions should match their importance to make it easier to complete a form.
Visual distinction helps users make “good” choices.

source : [2]

Example: "Web Design, Filling the Blanks"

Yammer

source : [2]

Constraint

source : [2]

Constraints are closely related to real affordances: For example, it is not possible to move the cursor outside the screen: this is a physical constraint.

Locking the mouse button when clicking is not desired would be a physical constraint. Restricting the cursor to exist only in screen locations where its position is meaningful is a physical constraint.

Scalability of Interfaces / Flexibility

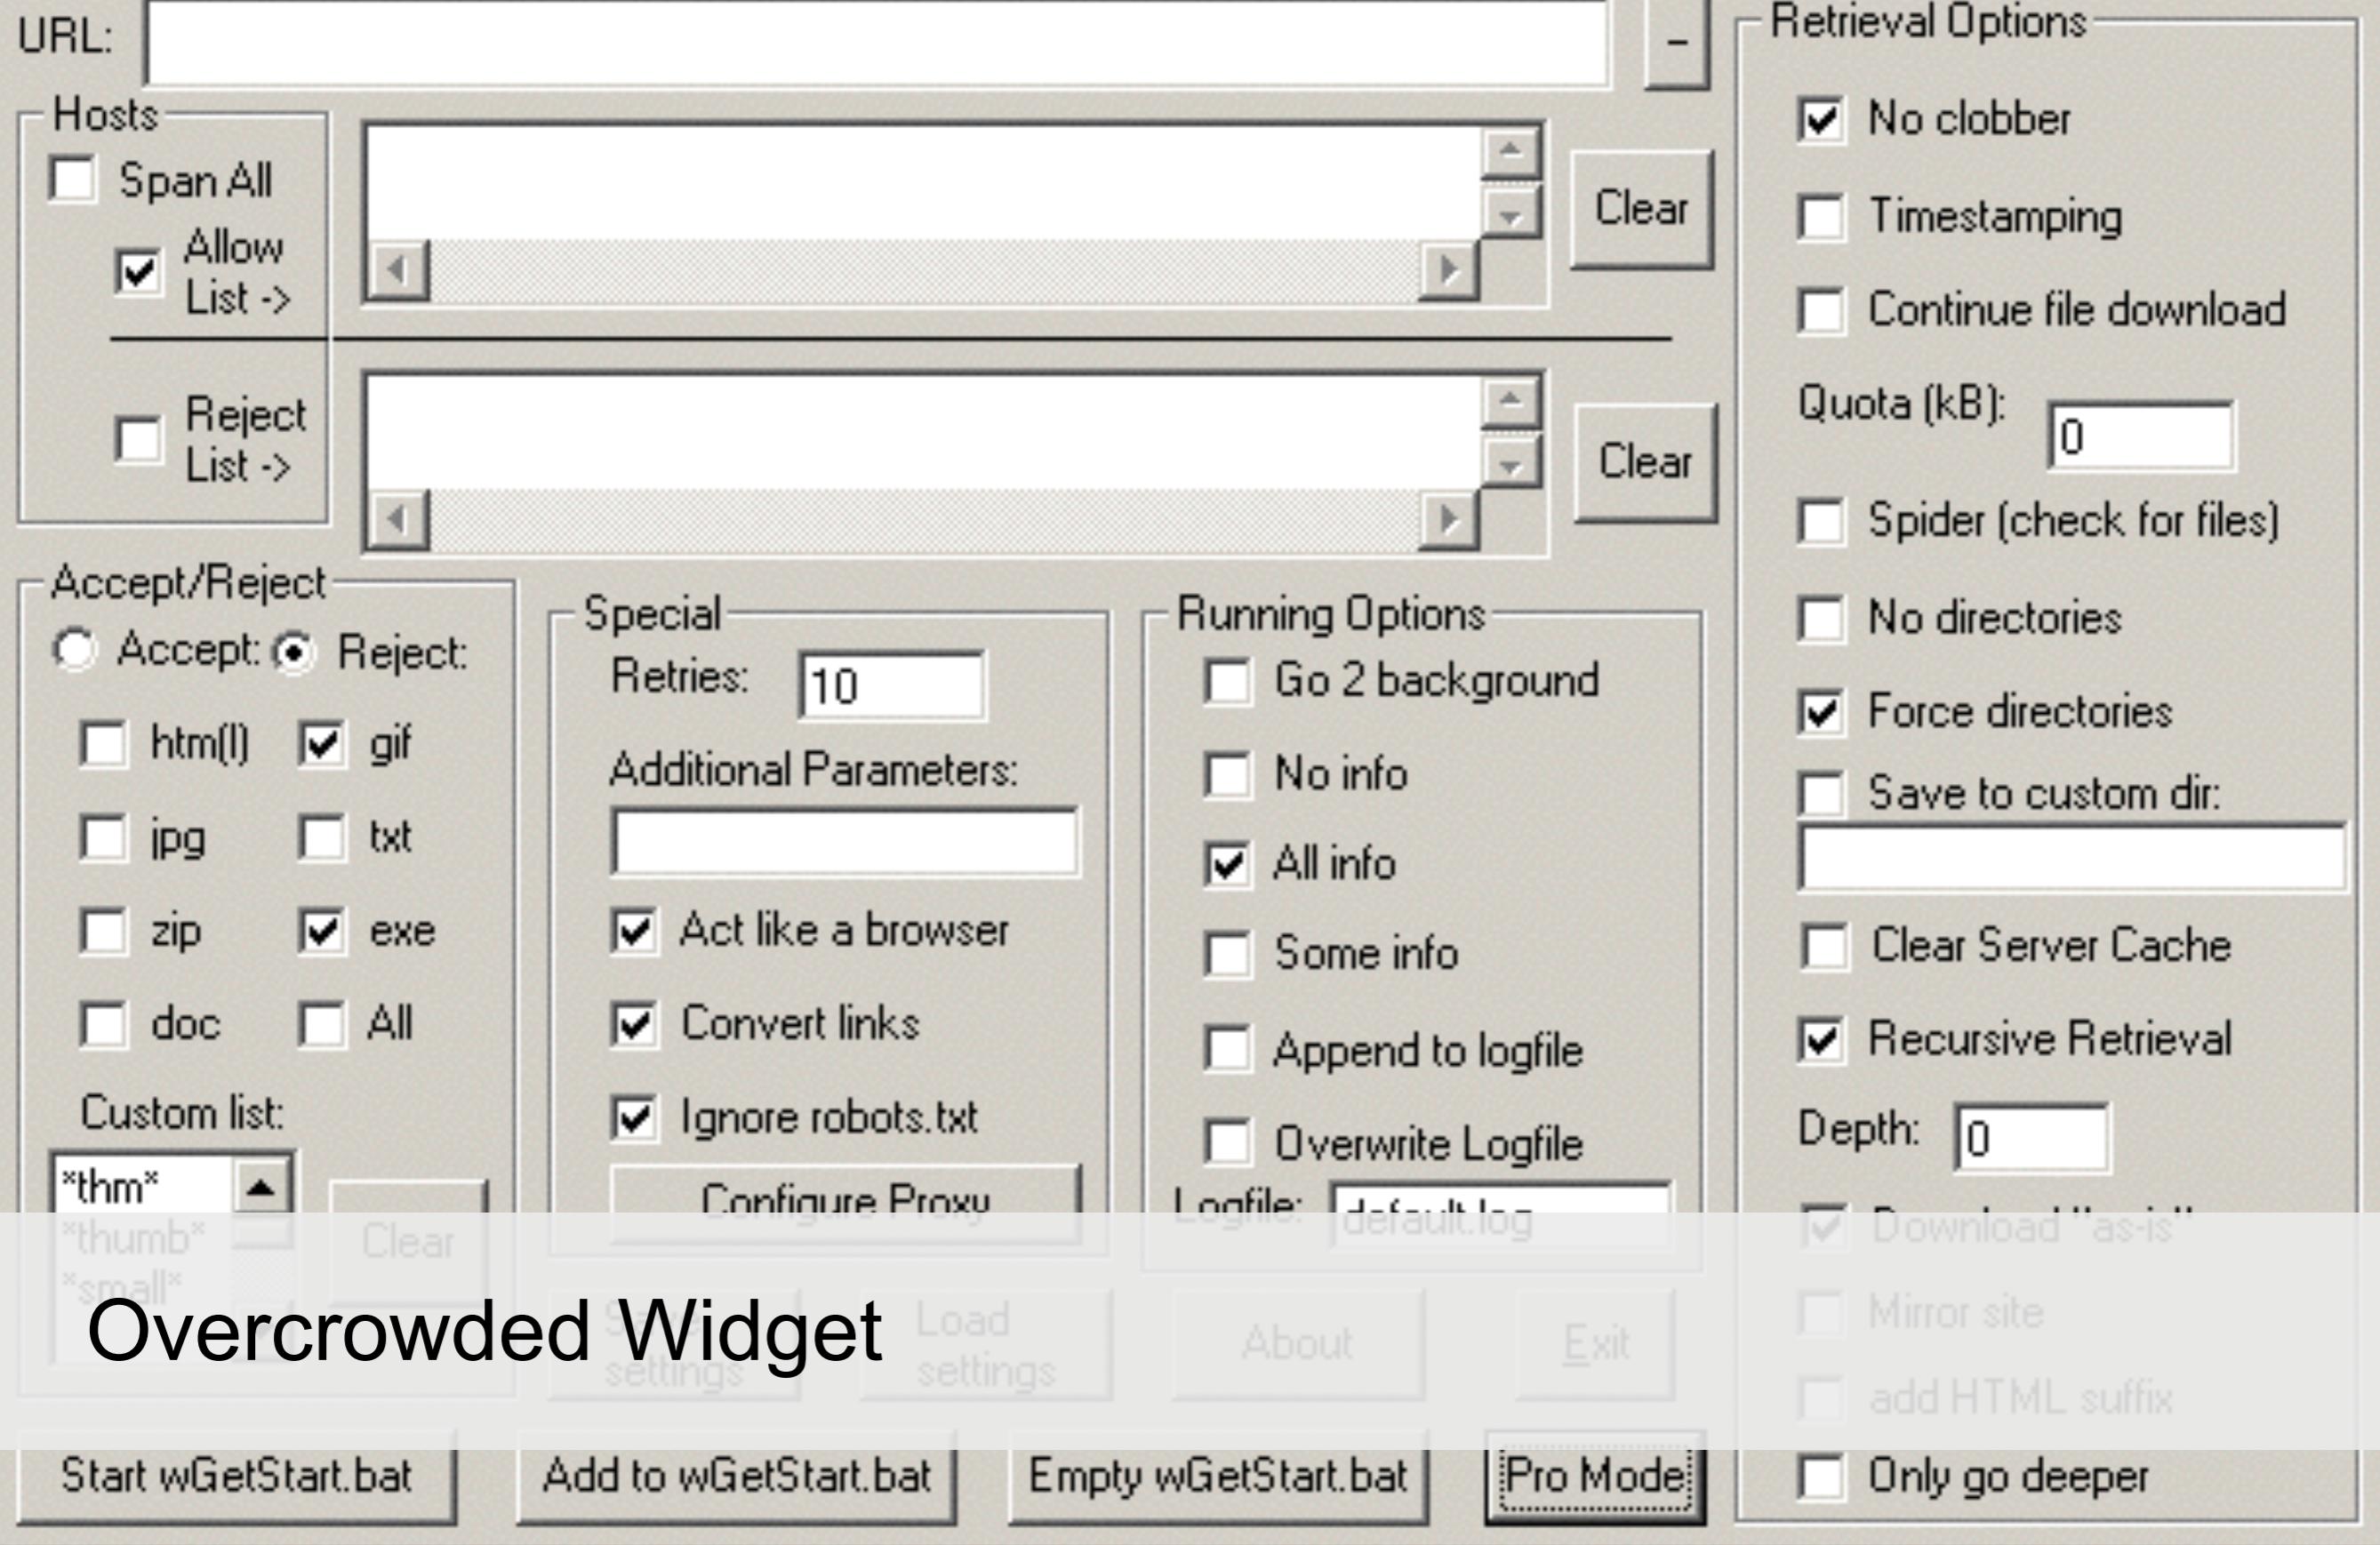

80/20 rule

source : [1]

A principle for setting priorities: users will use 20% of the features of your product 80% of the time. Focus the majority of your design and development effort (80%) on the most important 20% of the product.

source : [1]

Overcrowded Widget

Users are overwhelmed by options, limitless flexibility

Only show me what I need to see

Implement one easy to discover and easy to learn core pattern for common actions across the platform.

Adjust to users' preferences.

Make less common actions harder to reach.

source : [5]

Aesthetic-Usability Effect

source : [1]

http://www.swissknifeshop.com/media/catalog/product/cache/1/image/5e06319eda06f020e43594a9c230972d/v/m/vm_53831--91_sol_front_ax1000.jpg

Aesthetic-Usability Effect

Aesthetic designs are perceived as easier to use than less-aesthetic designs.

Aesthetic designs look easier to use and have a higher probability of being used, whether or not they actually are easier to use.

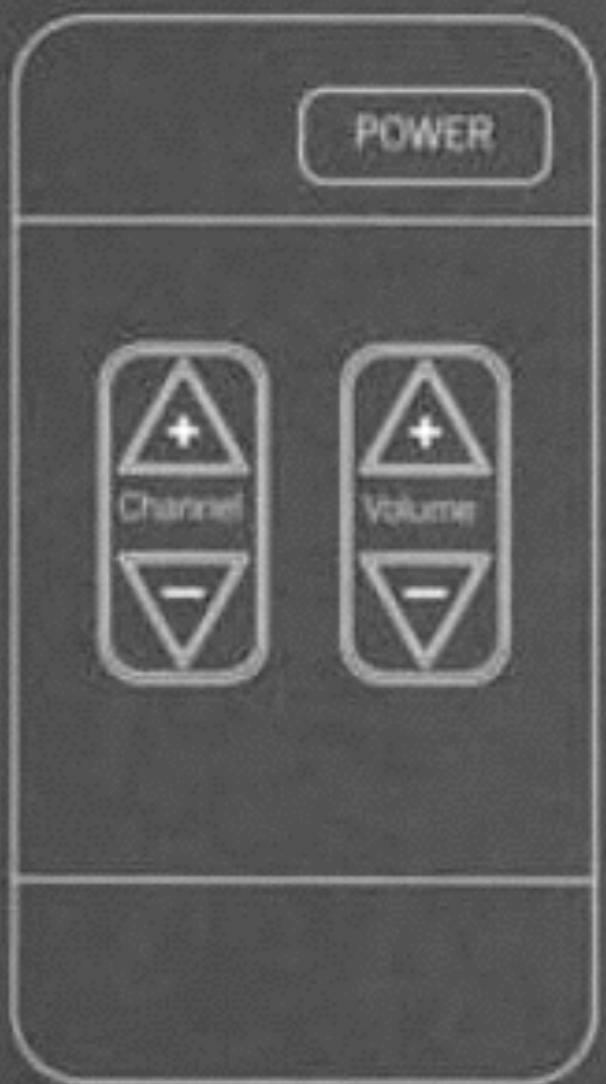

source : [1]

The flexibility-usability tradeoff is exemplified in the well known maxim “jack of all trades, master of none”.

Flexible designs can perform more functions than specialised designs, but they perform the functions less efficiently.

source : [1]

Color

- three main properties: hue, saturation (or intensity) and value (or brightness)

- hue refers to the color itself (the particular color within the optical (visible) spectrum of light), saturation refers to the brightness, value refers to the amount of black in a color

- color can provide cues for use

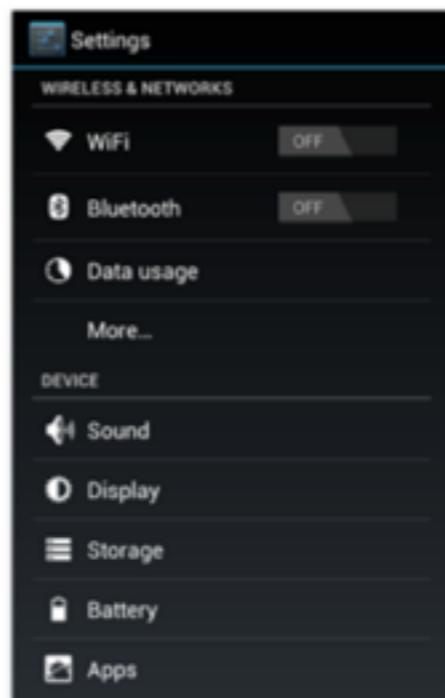

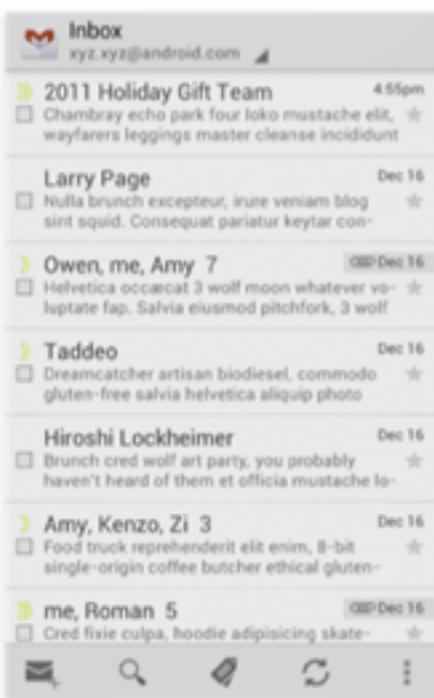

- color can establish a relationship

- color can indicate importance

- consider human factors such as color blindness and cultural differences

Symmetry

source : [2]

Symmetry ensures balance and clear organisation, if sometimes at the expense of visual interest. While this may be a drawback for a poster or retail packaging, it is perfectly appropriate for a user interface.

Mapping of Representation and Control

Graphical User Interface Design

- Principles
- Layout, Typography, Color & Contrast
- Controls and Widgets
- Simplicity

Simplicity

Approachability

Simple designs can be rapidly apprehended and understood well enough to support immediate use or invite further exploration.

source : [2]

Recognisability

Simple designs can be recognised more easily than their more elaborate counterparts. Because they present less visual information to the viewer, they are more easily assimilated, understood and remembered.

source : [2]

Immediacy

Simple designs have a greater impact than complex designs, precisely because they can be immediately recognised and understood with a minimum of conscious effort.

source : [2]

Usability

Improving the approachability and memorability of a product necessarily enhances usability as well. Simple designs that eliminate unnecessary variation or detail make the variation that remains more prominent and informative.

source : [2]

Reduction through successive refinement is the only path to simplicity

source : [2]
