

Information Visualization Tutorial WS 2009/2010
Dominikus Baur

VIII: 18.01.2010 - 21.01.2010

Task 1 - Literature

Read Heer et al.: "*Vizster: Visualizing Online Social Networks*" (Proc. InfoVis, 2005) (<http://jheer.org/publications/2005-Vizster-InfoVis.pdf>)

We will discuss the paper in the next session.

Task 2 - Write up your project

- a) Download the InfoVis Template from:
<http://www.cs.sfu.ca/~vis/Track/visweek.html>
- b) Use the structure from the course and adapt it according to your project (if necessary). Add at least one sentence to each paragraph that sums up what you want to write about. Add the literature you want to mention to the references section.
- c) Export a PDF-file and send it to dominikus.baur@ifi.lmu.de until 20.01.10.

Task 3 - Upload your project

- a) Do some last minute polishing if necessary.
- b) Upload the source code plus a working demo (i.e., executable file and required example data) to your wiki-page.
