Tools of Trade:

Interviews

Unstructured - are not directed by a script. Rich but not replicable. Structured - are tightly scripted, often like a questionnaire. Replicable but may lack richness.

Semi-structured - guided by a script but interesting issues can be explored in more depth. Can provide a good balance between richness and replicability.

Running the interview

- **Introduction** introduce yourself, explain the goals of the interview, reassure about the ethical issues, ask to record, present any informed consent form.
- Warm-up make first questions easy and non-threatening.
- Main body present questions in a logical order
- A cool-off period include a few easy questions to defuse tension at the end
- Closure thank interviewee, signal the end, e.g, switch recorder off.

Structuring frameworks to guide observation

- The person. Who?
 - The place. Where?
 - The thing. What?
- The Goetz and LeCompte (1984) framework:
 - Who is present?
 - What is their role?
 - What is happening?
 - When does the activity occur?
 - Where is it happening?
 - Why is it happening?
 - How is the activity organized?
