Tools of Trade:

Interviews

Unstructured - are not directed by a script. Rich but not replicable.

Structured - are tightly scripted, often like a questionnaire. Replicable but may lack richness.

Semi-structured - guided by a script but interesting issues can be explored in more depth. Can provide a good balance between richness and replicability.

Running the interview

- **Introduction** – introduce yourself, explain the goals of the interview, reassure about the ethical issues, ask to record, present any informed consent form.
- **Warm-up** – make first questions easy and non-threatening.
- **Main body** – present questions in a logical order
- **A cool-off period** – include a few easy questions to defuse tension at the end
- **Closure** – thank interviewee, signal the end, e.g, switch recorder off.

Structuring frameworks to guide observation

- - The person. **Who?**
 - The place. **Where?**
 - The thing. **What?**
- **The Goetz and LeCompte (1984) framework:**
 - Who is present?
 - What is their role?
 - What is happening?
 - When does the activity occur?
 - Where is it happening?
 - Why is it happening?
 - How is the activity organized?
