

Assignment 8 – Human-Computer Interaction 2

Note: Exercises are voluntary with the goal of preparing you for the final exam. The sample solution will be presented during the exercise sessions on Monday.

Concepts and coding skills taught in these exercises are relevant for the exam.

Over the coming weeks, we build a web based voting system using the MEAN stack (Mongo, Express, Angular, Node), which we can try out in class. (we follow Joe Lennon’s instruction: <http://www.ibm.com/developerworks/library/wa-nodejs-polling-app/>)

This Week (Step2 + 3):

Follow Joe Lennon’s instruction (Step 2 and 3) and answer the following questions:

1. What is AngularJs?
2. What is MongoDB?
3. What is Mongoose?

Solve the following modification in your code:

Add a button “delete Polls” to the Poll List interface (similar to the existing “New Poll”, except with a ‘minus’ symbol), which deletes all Poll questions when clicked. Show a webpage with the message “Polls successfully deleted” and a return button with “Back to Poll List”.
